

Women Entrepreneurs & Leaders

The needs of women entrepreneurs are no different than those of men - except on the days when they are.

At Citrin Cooperman, we understand that all entrepreneurs face unique challenges in building a business that lasts.

It's the goal of our Women Entrepreneurs & Leaders group to ensure that you make use of all the business tools available to propel your company's growth. And we're committed to supporting you in every way possible so you can reach the next rung on the ladder of success.

After all, women-owned businesses are the lifeblood of our economy. According to the Women President's Organization, women own at least half of the country's privately held companies.

In the mid-Atlantic region, statistics show that women hold a 50 percent or more ownership stake in over a million and a half privately-held businesses - accounting for over \$300 billion in sales, and employing nearly two million people. And that trend is on the rise.

Our firm was built by entrepreneurs who never faced a challenge they didn't relish and couldn't surmount. "Helping Entrepreneurs Succeed" isn't just our firm's motto. It's how we built our own business. This spirit infuses and invigorates everyone at our firm and helps us better serve you.
