

KRISTINA BENZA
President & CEO
County Fabricators, LLC

Kristina graduated from Villanova University in 2011 with a dual degree in Comprehensive Sciences and Mathematics. Following her original plan to enter the medical field, she then attended New York Medical College. She graduated NYMC in 2013 with a M.S. in Basic Medical Sciences.

After ultimately deciding not to attend medical school, Kristina purchased County Fabricators in late 2013, becoming the Managing Member and majority owner. She spearheaded an extensive marketing effort that resulted in relationships with Tappan Zee Constructors building the new Mario M. Cuomo Bridge and several other major civil construction firms in the Northeast to include giants such as Kiewit, Skanska, and Tutor Perini.

Kristina initiated the effort to improve quality control and production standards at County Fabricators to be consistent with American Institute of

Steel Construction (AISC) guidelines resulting in AISC certification in Simple Bridge, Bridge Components, and Building Structures. She is an American Welding Society Certified Welder.

Recently, Kristina was named a 941 Magazine Wunderkind, and County Fabricators was just announced as #75 on Inc. Magazine's list of the 5000 fastest growing privately-owned companies in the United States (#2 in the Construction category). Kristina has big plans for the future of County Fabricators that include moving to a larger facility and seeking AISC certification in the Intermediate and Major Bridge categories which would enable the company to work on larger structural steel projects. When not at the shop, Kristina can usually be found watching the NY Yankees or the Villanova Men's Basketball team (Go Wildcats!), or playing with her two adorable labradoodles.
