

CITRIN COOPERMAN®
Accountants and Advisors

OUTSOURCED IT AND MANAGED SERVICES

Focused on Technology

Monitoring potential IT vulnerabilities has become one of your most critical responsibilities. Protecting your data and your business requires the right strategies combined with the best tools and the most knowledgeable experts.

How Citrin Cooperman Can Help

We offer everything that an internal IT department provides, from strategic planning, to computer system selection, to implementation and support, but on an outsourced basis.

Our clients rely on our team to guide them through the identification and assessment of the risks their organization faces. We also advise on finding the right solutions to maximize our clients' performance and security in a technologically-advanced world.

[Related Services](#)

Hardware/software implementation - Whether you need to install a single machine, upgrade all of your computers and servers, or migrate systems to the Cloud, we are available to assist your company. Implementation services include:

- File servers (physical, virtual, Cloud)
- Workstations (and other hardware)
- Networks (LANs and WANs)
- New software and upgrades
- Email
- Internet connectivity
- Firewalls
- Network and perimeter security

Outsourced CTO

- Strategic planning
- Network design and implementation
- IT policy and procedure
- Network security
- Internal IT audit/change control
- Business intelligence
- Data analysis
- Database development

Network administration - The TRAC team can be your virtual IT department, managing all of your network administrative tasks, always with an eye on proactive planning and problem avoidance. Network administration services include:

- Maintaining user accounts
- Managing network security and access permissions
- Monitoring resource utilization

Managed services and proactive maintenance - Our TRAC professionals have been providing managed services to clients since before the term was popularized. We believe that proactive managed services should be the foundation of any service offering, and not the complete extent of a service offering. Our managed services include:

- Proactive monitoring
- Patch management
- Monitoring and testing backups
- Hardware/software inventory
- Vendor liaison
- Help desk
- Training
