

TECHNOLOGY AND RISK ADVISORY CONSULTING (TRAC)

Focused on People, Process and Technology

In today's environment, companies are exposed to the mounting risks associated with increased business complexity, technology challenges, the growing regulatory environment, and cybersecurity threats and breaches. Protecting your business, data, systems, and bottom line from the threats that exist in today's complex business environment requires the right partners.

How Citrin Cooperman Can Help

Citrin Cooperman's Technology and Risk Advisory Consulting Practice (TRAC) offers integrated services in the areas of risk, technology, and compliance, so our clients can focus on what counts – their business.

Backed by decades of experience, our business-focused team of more than 40 professionals advises clients in all lifecycles of their business to minimize risk, fill

resource gaps, and improve overall bottom line performance. Whether developing programs and strategies to enhance internal controls, improving processes, finding solutions to maximize security against a data breach, building custom databases, recommending and implementing hardware/software, or relocating an office, we help our clients address the technology and risk management challenges throughout their organization.
